# NEW FOR 2026

available from March 2026

GPO SPECTRA™ riflescopes -  
now available with rail mount

## GPO SPECTRA™ riflescopes - now also available with rail mount

In a further development of high-quality GPO product design, selected riflescopes from the SPECTRA™ series are now also available for rail mounting. With this move, GPO is fulfilling the frequently expressed demand from hunters both at home and abroad for a particularly elegant, secure, and practical mounting solution.

All models utilize the profile of the proven ZEISS internal rail, ensuring wide availability of tested

mounts from nearly all manufacturers for common firearm systems. All the models with rail mount can also be retrofitted with the GPO Ballistic Turret (GBT) at any time.

The new models will be available at specialized retailers during Q2/2026. With GPO, you are perfectly equipped for every hunting situation - reliable, precise, and thoughtfully designed for the field.
